

Ethan Chen

+1 470-494-1588 | ec@gatech.edu | [echen347.github.io](https://github.com/echen347) | linkedin.com/in/ethanc27

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Mathematics, Bachelor of Science in Computer Science

August 2023 - May 2027

- **President and Co-Founder** of GT Competitive Math, **Co-President** of GT Undergrad Math Advisory Committee
- **Undergraduate:** Natural Language Processing, Graph Theory, Algorithms, Statistical Theory
- **Graduate:** Convex Optimization, High Dimensional Statistics, Statistical Machine Learning, Probability, Online Machine Learning, Sequence Prediction, Intro to Uncertainty Quantification, Optimal Transport, Geometric and Generative Deep Learning, Graphical Models in ML, Measure Theory, Differential Geometry

EXPERIENCE

Susquehanna International Group (SIG)

Chicago, IL

Quantitative Trading Intern

June 2026 – Aug 2026

- Single Stock Equity Options Market Making

Trading at Georgia Tech

Atlanta, GA

Quantitative Research Lead

Sep 2025 – Present

- Lead recruiting, onboarding, and mentorship of quant researchers; manage research pipeline and strategy deployment
- Developed MFT crypto alpha strategies achieving **25% cumulative returns** with **Sharpe ratio > 2**

Williams College

Williamstown, MA

REU Participant

June 2025 – Aug 2025

- Optimal transport methods for normalizing flows; **contributed to JMM publication on generative models**

Georgia Institute of Technology

Atlanta, GA

Undergraduate Researcher

Feb 2024 – Present

- Duality between zero-sum sequential games and optimal transport; **solo-authored NeurIPS submission**
- Multi-marginal optimal transport and Nash equilibria in regularized sequential games; **solo-authored ICML publication**
- Statistical estimation of martingale optimal transport plans; **solo-authored ICLR publication**
- Statistical complexity research; **contributed to successful 2025 Sloan Research Fellowship proposal**
- Gradient-flow and sampling methods with convergence guarantees for non-log-concave distributions and molecular dynamics

HyTech Racing (Formula SAE)

Atlanta, GA

Optimization Lead

Jan 2025 – May 2025

- Migrated MATLAB data pipeline to Python, cutting processing errors by **18%**
- Developed ML models for power distribution boosting performance by **15%**
- Contributed to team securing **3rd place overall** in the 2025 competition and setting a **world record** in the acceleration event

PUBLICATIONS

Chen, E. “Entropically Regularized Martingale Optimal Transport with L_1 Relaxation”. *International Conference on Learning Representations (ICLR) Workshop on Advances in Financial AI*.

Chen, E. “Sequential Minimax Games as Stacked Martingale Optimal Transport”. *International Conference on Machine Learning (ICML) NExTGame Workshop*.

Chen, E. “Sharp Lipschitz Bounds for Bounded-Capital Sequential Games via Martingale Optimal Transport”. *Conference on Neural Information Processing Systems (NeurIPS)* (under review).

Chen, E., et al. “Generative Machine Learning Models for Data Assimilation”. *Joint Mathematics Meetings (JMM)* (poster).

AWARDS AND HONORS

Putnam (Scores of 27, 21); AIME Qualifier (3x); Citadel Securities Quant Invitational; MIT Summer Geometry Initiative

PROJECTS

Quantitative Portfolio Analytics Platform

Django, AWS, MySQL, Python, C++

- Engineered full-stack quantitative analytics platform processing **1M+ daily data points**
- Optimized MySQL schemas reduced query times by **35%**

TECHNICAL SKILLS

Python, Java, C++, SQL, PyTorch, TensorFlow, NumPy, Scipy, AWS, Git
